UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 2

November, 1931

Number 11

Contents of the November Bulletin.

The extent of crime, as reflected by the reports from police departments of cities and counties cooperating with the Bureau of Investigation in gathering crime statistics, is indicated, for jurisdictions reporting, in the regular tables published in the current bulletin.

The number of offenses reported by urban police departments is set forth in Table I, while Table I-A contains the number of crimes reported by counties, United States possessions, and others. Revised reports, which are those previously published but in which some adjustments have been made, and reports for months previous to November, received since the October issue of the bulletin, are contained in Tables II, II-A, and II-B.

The remaining tables of the bulletin show the extent of the population area covered by the statistics in the above tables, the total number of current and supplementary reports that have been received from police departments during the year, the average number of crimes per day, and the per cent of each offense class to the total number reported.

In publishing the reports sent in by chiefs of police in different cities, the Department of Justice does not vouch for their accuracy. They are given out as current information which possibly may throw some light on problems of crime and criminal law enforcement.

The term "Offenses known to the police" is designed to include those crimes designated as Part I Classes of the Uniform Classification occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported to the police: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of \$50 and over and (b) thefts of under \$50; and auto theft. The figures contained herein include also the number of attempted crimes of the designated classes. Attempted murders, however, are reported as aggravated assaults. In other words, an attempted burglary or robbery, for example, is reported in the monthly bulletin in the same manner as if the crime had been completed.

"Offenses known to the police" include, therefore, all of the above offenses, including attempts, which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Population Table.

The number of cities which at any time during the year 1931 have contributed returns of offenses known to the police to the Bureau of Investigation reached 1,485 in November. These cities represent a population of 50,891,147. This figure, of course, excludes the population represented by returns received from county and other jurisdictions. Returns were also received from a number of counties in the various States, State police in several jurisdictions, the third and fourth divisions of Alaska, Canal Zone, and Porto Rico. Supplementary returns were forwarded from various other possessions. In the following table are shown the number and per cent of the cities and the number and per cent of the population of those cities of more than 10,000 inhabitants from which returns have been received for any one month of 1931. In addition to those listed in the table there are 725 cities of the smaller population groups and rural townships representing an aggregate total population for both groups of 4,185,034, which also contributed returns at some time during the current year.

Population groups	Total number of cities or towns	Cities filing returns		Total population	Population represented in return	
		Number	Per cent		Number	Per cent
Total.....	953	760	77	58,340,077	46,706,113	80
A. Cities over 250,000.....	37	34	92	28,784,770	21,330,815	74
B. Cities 100,000 to 250,000.....	56	54	96	7,540,966	7,288,537	96
C. Cities 50,000 to 100,000.....	98	91	93	6,491,448	6,010,291	91
D. Cities 25,000 to 50,000.....	185	169	91	6,425,693	6,003,447	93
E. Cities 10,000 to 25,000.....	606	422	70	9,007,300	6,473,023	71

The above table does not include 725 cities and rural townships, aggregating a total population of 4,185,034. The cities included in this figure are those of less than 10,000 population filing returns, whereas the rural townships are of varying population groups.

Large Increase in Number of Reports Received for November.

The number of reports received for the month of November showed an increase of 66 over the number of returns received in any previous month. Forty-eight of these reports were from cities which previously had never contributed crime statistics to the Bureau of Investigation making a total of 1,333 cities from which current returns were received for that month. In the following table there is set forth a comparison by States of the total number of returns received for the months of the current year. Supplementary returns are excluded from this tabulation.

The number of reports received for the month of November showed an increase of 66 over the number of returns received in any previous month. Total published returns.

A comparison of the total number of returns, including supplementaries, which have been received monthly during the current year from the various States, is set forth in the following table. As distinguished from current returns, supplementary returns are those which have been received since the last issue of the bulletin.

In order to make available complete statistics covering the entire reporting area for the whole year, it is requested that police departments which have heretofore failed to do so, forward, if possible, the data for the months previous to November.

¹ Revised.

Average Daily Offenses.

The number of cities which have contributed returns for any two successive months likewise showed a substantial increase for the months of October and November. The following table shows the daily average of crimes of the designated classes occurring in a group of 1,262 cities which submitted complete and properly classified returns for the months of October and November. This group represents an increase of 35 over the similar group for the months of September and October.

Percentage Table of Part I Offenses.

The per cent of each offense class to the whole for 1931 is shown by months in the following table. These figures, however, are not intended to indicate crime trends for the particular period but merely reflect the per cent of each class of the designated crimes to the whole group for the various months. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

Per cent of offenses known, 1931

Annual Return Forms.

During the first week in January forms will be distributed for the purpose of obtaining statistics on the number of offenses reported to the police and the number of persons charged, on an annual basis for the year 1931. These forms are designated B and C, and instructions will be given for tabulating the data requested. The information should be mailed to the Bureau of Investigation on or before the first of February, 1932, if possible.

The data in Return B is confined to the Part I Classes which consist of major offenses most generally reported to the police. Return C, however, includes, in addition to the Part I Classes, the Part II Classes of the Uniform Classification of Offenses in which are included misdemeanors and some felonies which are generally not quite as prevalent as those in the Part I Classes.
